| Project Description | Reaction with fixed slave socket to fit PTM-52-800 |                |       |
| Date created        | 10 December 2014                                   | Project Number | Q2805 |

## INTRODUCTION & APPLICATION

Truck manufacture application requiring bolts at 104mm centres final torque tightening to 700 N.m max.

## SOLUTION

Pneutorque PTM-52-800 fitted with special reaction having a fixed slave socket with round bore to react on adjacent bolt head.

## TECHNICAL SPECIFICATION / DATA HIGHLIGHTS

Ø40mm plain bore slave socket with 116mm reach from top (tool side) of reaction plate.  
The reaction is designed for 700 N.m maximum application torque.  
For final torque tightening only i.e. fixed slave socket does not suit bolt run-down.  
*(A travelling slave socket as used on Truktorque is required for run-down applications.)*  
This example reaction is designed for a specific application. Other sizes and types are available.  
Please contact Norbar with your application requirements for suitability confirmation.
